Renovation of St. Stephen Square

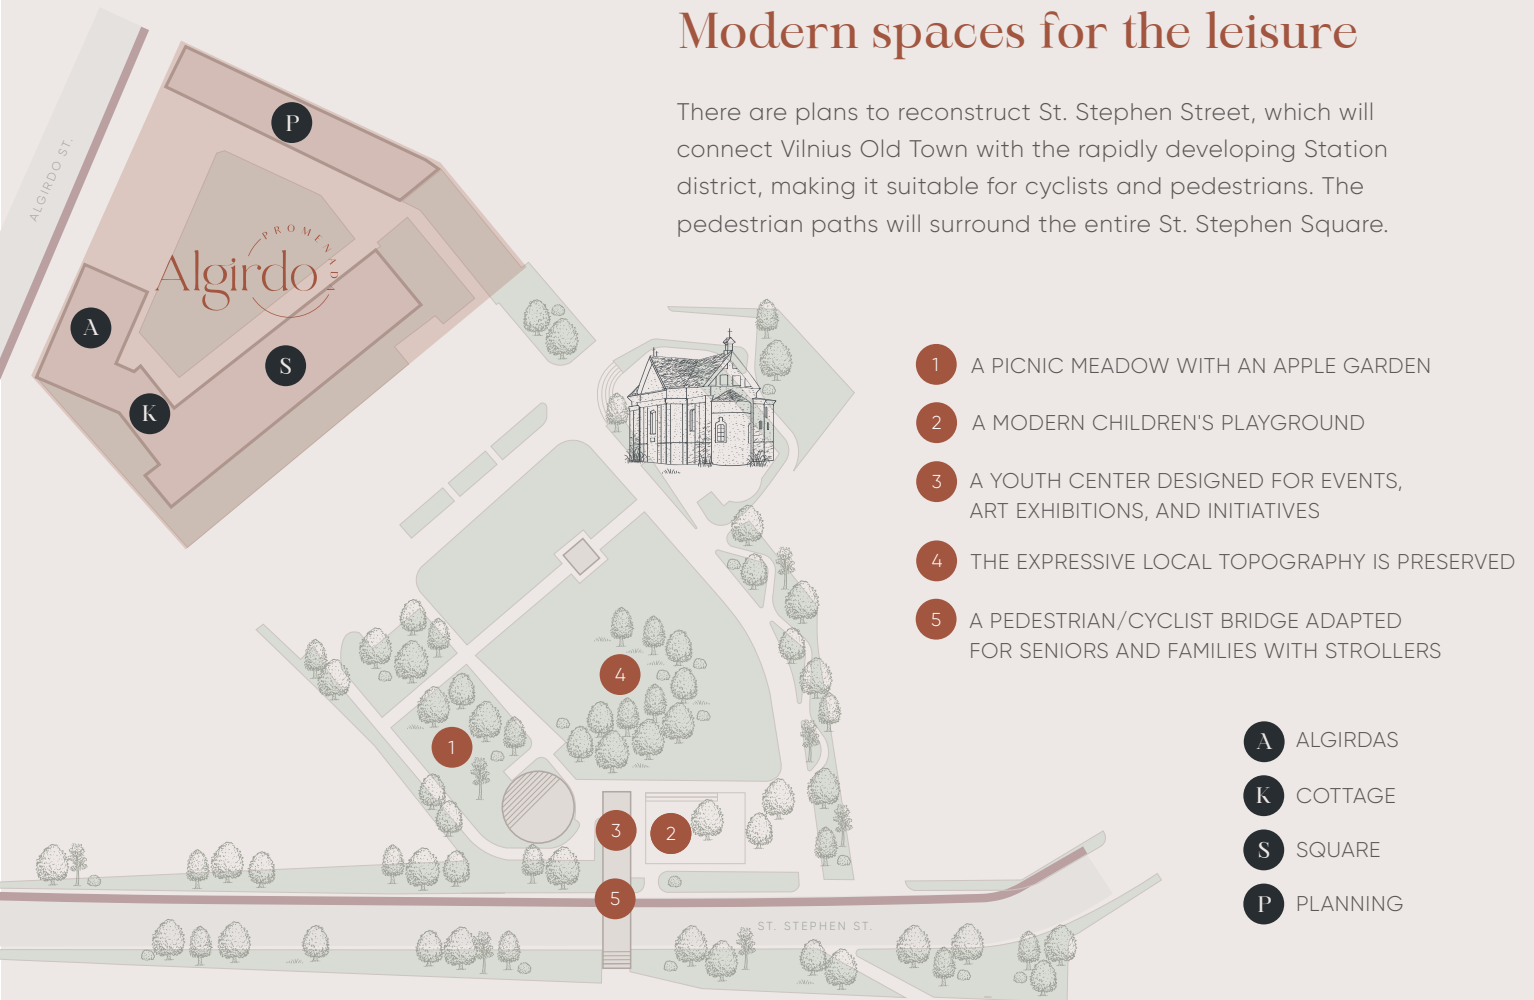

The renovated **St. Stephen Square** will soon become the main green space at the intersection of **New Town and Old Town**.

The surroundings of St. Stephen's Church are planned to be renovated and adapted to meet the needs of the community, restoring the historic route of St. Stephen Street, with priority given to pedestrians and cyclists.

Modern spaces for the leisure

There are plans to reconstruct St. Stephen Street, which will connect Vilnius Old Town with the rapidly developing Station district, making it suitable for cyclists and pedestrians. The pedestrian paths will surround the entire St. Stephen Square.

The space will be dedicated to the leisure of modern urban dwellers, while not forgetting its significant historical context. It is expected to become an attractive destination, opening up new opportunities for the development of dining and retail businesses.
